SUMMARY

Results-driven ML Engineer with 3+ years of experience building and deploying scalable Machine Learning and Generative AI solutions across enterprise environments. Skilled in developing end-to-end AI systems including RAG pipelines, semantic retrieval platforms, and demand forecasting engines using AWS, LangChain, OpenSearch, and Docker. Experienced in designing production-grade data pipelines, multimodal document processing workflows, and ML deployment architectures for large-scale enterprise applications.

EDUCATION

Presidency University, Bangalore

B.Tech in Electronics and Communication Engineering

Bengaluru, Karnataka

Graduation Date: Aug 2022

WORK EXPERIENCE

Ernst & Young LLP (EY) | Client: Dell Technologies

Bengaluru

AI Engineer

Feb 2025 - May 2026

- Owned end-to-end development of an Enterprise Document Co-Pilot system for semantic search, summarization, and intelligent retrieval across large-scale enterprise documentation.
- Designed and built serverless event-driven ingestion pipelines using AWS S3, Lambda, Step Functions, and Terraform for scalable processing of unstructured and scanned documents.
- Implemented multimodal document extraction workflows using AWS Textract and Rekognition, followed by preprocessing, cleansing, and validation using Python and Pandas.
- Developed RAG-based retrieval and summarization pipelines using LangChain, AWS Bedrock, prompt engineering, and OpenSearch vector indexing for enterprise knowledge discovery.
- Participated in architecture discussions, code reviews, sprint demos, and cross-functional collaboration with stakeholders.

InfiData Technologies

Bengaluru

ML Developer

Feb 2023 - May 2024

- Delivered end-to-end ML solutions across 30+ client projects spanning regression, classification, and predictive modeling use cases, deploying production-ready models via Flask-based REST APIs.
- Integrated 30+ trained ML models into live web applications, enabling real-time inference and data-driven decision-making directly within client-facing products.
- Trained 500+ students across structured AI/ML programs covering Python, supervised learning, and deep learning, consistently engaging participants on practical, real-world applications.
- Represented the organization as speaker at AI/ML workshops across academic institutions, engaging 150+ participants on applied predictive modeling and data science best practices.

SKILLS & INTERESTS

Languages: Python, SQL, Git, MongoDB

ML/AI: Regression, Classification, Time Series (ARIMA, SARIMAX), XGBoost, Random Forest, SVM, LSTM, MLP, CNN, Feature Engineering, EDA, Cross-Validation, Hyperparameter Tuning

Backend,APIs: FastAPI, Flask, RESTful APIs

Cloud,DevOps:: AWS (S3, EC2, Lambda), Docker, Kubernetes, End-to-End ML Lifecycle

Databases: PostgreSQL, MongoDB, Redis

GenAI,LLMs: RAG Pipelines, LangChain, FAISS, OpenAI APIs, Prompt Engineering, Vector Embeddings
